1.0 Purpose

To establish a system to be followed for proper control, evaluation, tracking/monitoring and documenting of all engineering activities in all factories

2.0 Scope

This procedure applies to all categories of Engineering Maintenance Work done at Mega Pak Zimbabwe Limited Ruwa including projects, installations and modification.

3.0 Responsibility

The Plant Engineer will review and revise this procedure.

4.0 Definitions

Job Card in this context shall mean a document used to request for service from the Engineering Department.

4.0 Activity description

4.1 There are two major reasons for initiating a Job Card which are:

- 4.1.1 for the attention of a defect on installed machinery/equipment.
- 4.1.2 For any new developments.
  - 4.1.2.1 Project work or new installation.
  - 4.1.2.2 Modification to plant/equipment.

4.2 Initiating of a Job Card falls into three categories

- 4.2.1 Job Cards by Non-Engineering Services Personnel.
- 4.2.2 Job Cards by Engineering Services Personnel.
- 4.2.3 Job Cards by Planning Office.

4.3 Non-Engineering Services Personnel

4.4 All sections on the front side of the card should clearly be filled in by the initiator indicating:

- 4.4.1 Name of Person requesting for the service.
- 4.4.2 Date Job Card Raised.
- 4.4.3 Time Job Card Raised.
- 4.4.4 Priority.
- 4.4.5 Required Date of Completion.

4.4.6 Plant Identification Number ***Note: be specific on plant name and number.***

4.4.7 Plant Description

4.4.8 Job request in brief.

4.4.9 Plant Status would mean either:

i) a defect that requires attention while machine/equipment is in use (Run) or during shut (Stop)

ii) a maintenance schedule that has to be carried out while machine/equipment is in use (Run) or during shut (Stop)

4.5 The Job Card is raised in triplicate.

4.6 After filling all sections mentioned above (4.4.1 to 4.4.9) the initiator's supervisor shall sign to approve the job request before detaching YELLOW copy together with the WHITE copy.

4.7 The production supervisor shall enter the job card number and the correct **FAULT CODE** into the maintenance database.

4.8 The green copy is left undetached in the job card book for reference purposes.

4.9 The initiator shall take the yellow copy to the respective Engineering Supervisor. Upon receiving the job card, the engineering supervisor shall approve the work request, allocate the job card to the artisan (write the name on the job card).

4.10 In case the engineering supervisor is not available, the job card shall be handed to the artisan in that factory and the artisan shall appraise his or her supervisor on the job cards received in his (supervisor) absence.

4.11 Both the Artisan carrying out the work and the Machine Operator shall note down the time work is started as well as the time when work was completed and sign on the reverse of the Job Card (*hard copy*).

4.12 All works to be carried out in compliance with Mega Pak's FSSC 22000 and ISO14001 standards.

4.13 Artisan will fill in **ALL** the details required on the reverse side of the Job Card (*hard copy*).

4.14 The initiator shall also sign on the "originator sign off" slot to accept that the job has been done as requested.

4.15 The Artisan shall then take the job card to his/her respective Supervisor who should comment on the Job Card before signing to approve the standard and quality of work done by the Artisan.

4.16 The supervisor shall take note of the spares and extra works required as commented by the artisan and add to his/her planning book/diary. The job card is then forwarded to the Planning Office.

4.17 Planning will capture feedback data from the Job Card (*hard copy*) into the **Maintenance Management** database for history and further analysis.

4.18 The hard copy will be in the custody of the Planning Department for a period not exceeding twenty-four months before it is archived.

4.19 Engineering Services Personnel.

4.20 All sections on the front side of the card should clearly be filled in by the initiator as in 4.4.1 to 4.4.9.

4.21 After filling all sections mentioned above, the initiator's supervisor shall sign to approve the job request before detaching Yellow copy together with the white copy.

4.22 The Supervisor shall register the job card in the ***Maintenance Management Database.***

4.23 The Artisan carrying out the work and or the Machine Operator shall note down the time work is started as well as the time when work was completed and sign on the reverse of the Job Card (*hard copy*).

4.24 The Artisan will fill in all the details of work done and the spares used as required on the reverse side of the Job Card (*hard copy*).

4.25 The initiator of the Job Card will also sign to accept that the job has been done as requested.

4.26 The Artisan will then take the job card to the respective Supervisor who should comment on the Job Card before he signs to approve the standard of work done and quality of work done.

4.27 The supervisor shall take note of the spares and extra work required as commented by the artisan and adds to his/her planning book/diary.

4.28 Planning will capture feedback data from the Job Card (*hard copy*) into the **Maintenance Management Database** for history and further analysis.

4.29 The hard copy will be in the custody of the Planning Department for a period not exceeding twenty-four months before it is archived.

4.30 Engineering Planning Work

4.31 Job Cards raised by Planning arise from:

4.31.1 The analysis done on the Routine Checklists that are done by the Engineering sections including the PPC's observations from plant tours.

4.31.2 System triggered due for maintenance.

4.31.3 Any other as directed by the Plant Engineer/Technical Director

4.32 Steps 4.4.1 to 4.4.9 are followed as stated above

4.33 Both the top white copy is retained by Planning for follow up purposes.

4.34 Planning Office will register the Job Card in the ***Maintenance Management Database*** before issuing the yellow hard copy to the respective section supervisor for execution.

4.35 Upon receipt of the Job Card (*hard copy*), the Engineering Supervisor will log it in the Maintenance Management Database before handing it over to the respective personnel to carry out the requested work.

4.36 Both the Artisan carrying out the work and the Machine Operator shall note down the time work is started as well as the time when work was completed and sign on the reverse of the Job Card (*hard copy*)

4.37 Artisan will fill in all the details required on the reverse side of the Job Card (*hard copy*).

4.38 The Artisan will then take the job card to his/her respective Supervisor who should comment on the Job Card before signing to approve the standard and quality of work done by the Artisan.

4.39 The supervisor shall take note of the spares and extra work required as commented by the artisan and adds to his/her planning book/diary.

4.40 Planning will sign off as originator after completion of work to acknowledge that work was done as requested.

4.41 Planning will capture feedback data from the Job Card (*hard copy*) into the **Maintenance Management** database for history and analysis.

4.42 The hard copy will be in the custody of the Planning Department for a period not exceeding twenty-four months before it is archived.

4.43 Reports for Completed job cards and outstanding jobs can be retrieved from the database when required. NB: Completed job cards should be submitted to the Planning Office within 24 hours for accurate updating of the database.
